Art Unit: 2653

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Wada et al (6480454). The reference shows an optical pickup for reading and writing data into a disk comprising: an aberration correction element 184 having a retardation member (liquid crystal) for selectively varying the phase difference of the incident light beam based on the polarization direction as column 22 lines 40-47.

Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2653

None of the cited prior art shows the structural elements of the aberration member operating as claimed.

Claims 4-47 are allowed.

None of the cited prior art shows or teaches the first and second retardation elements within the aberration correction element operating as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6584058.
